1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 10 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Veale.

As to claims 1 and 11, note Fig. 5, which shows a DC offset correction method and apparatus, where the determination of current maximum and minimum peaks is performed in block 50, and the average of these values is taken in circuit block 56, in order to yield a DC offset estimate. The subtraction step of claim 10 is taken in circuit block 58.

2. Claims 20 and 21 are allowed.

Claims 2-9, 12-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Art Unit: 2816

Each of the remaining references cited on the attached PTOL-892 form is seen to anticipate at least independent claims 1 and 11, i.e., they all disclose DC offset correction methods and apparatus, having determination of current maximum and minimum peaks, and the averaging these values to yield a DC offset estimate.
